

The figure displays 20 bar charts, each representing a different Italian region. Each chart tracks two metrics over time (from April 2020 to January 2021): 'totale_positivi' (orange bars) and 'totale Ospedalizzati' (blue bars). The y-axis scales are tailored to the data range of each region. The regions shown are: Abruzzo, Basilicata, Calabria, Campania, Emilia Romagna, Friuli Venezia Giulia, Lazio, Liguria, Lombardia, Marche, Molise, PA Bolzano, PA Trento, Piemonte, Puglia, Sardegna, Sicilia, Toscana, Umbria, Valle d'Aosta, and Veneto. The charts illustrate the progression of COVID-19 cases and hospitalizations across these regions during the early stages of the pandemic.
